

Enable Your Technicians With Synchron Parts Catalog

Empower your field teams by providing a single, on-demand solution to troubleshoot, search, and order parts.

As service organizations face massive talent shortages and high attrition rates, they're recognizing the importance of setting their field teams up for success. Synchron Parts Catalog enhances troubleshooting by providing a visual, interactive view of an exploded assembly and associates relevant knowledge materials. Part ordering is streamlined with intelligent recommendations aligning with inventory planning strategies.

Search for and order parts anytime, anywhere

Centralized catalogs are available anytime with offline search and content availability

Add context to your knowledgebase

Synchron Parts Catalog moves your organization forward on the path to structured data by adding context to your knowledgebase

Automate ordering with intelligent part recommendations

Order substitute and superseded parts and align to inventory planning strategies

Easy to view imaging that integrates with knowledgebase materials

Optical character recognition (OCR) scans engineering drawings, creating interactive assembly views that easily integrate with knowledgebase materials

Embed in existing field service management solutions

Easily plug Synchron Parts Catalog into existing field service management solutions and reduce the need to use multiple apps

Core capabilities

- Interactive assembly views integrate with knowledgebase
- Intelligent part recommendations including substitute and superseded components
- Manage consumables and components with part kits
- Extend knowledge to third-party contractors
- Out-of-the-box protocols to authorize users and decrypt knowledge in seconds
- Offline ready with configurable security access levels
- Version control, access timeout, and service bulletins

Benefits our customers have experienced

Improved margins by reducing technician enablement costs

Improved customer satisfaction and brand reputation

Reduced legal liabilities by always using the right parts

Accelerated time to value within existing service management platform investments

Reduced part waste and alignment with sustainability initiatives
